

WE MAKE IT ONLY ONE WAY ... PRECISE.

The choice for precision is yours.

CerroSpec® is our world-class seamless, thin-wall copper tube that meets exacting dimensional tolerances for improved performance and greater product yield.

CerroGroove® is our precision, internally grooved tube that provides superior heat transfer, which lowers OEM manufacturing costs through the production of smaller, more efficient cooling units.

To ensure this precision, we start with cold pilger rolling processing and end with our carefully controlled annealing process to assure superior product quality, enhanced production efficiency and increased cost savings. We also offer I.D. payout, "environmentally green" packaging programs, reliable delivery, extensive product selection and much more.

For the very best in precision copper tube, take your pick and contact Cerro today. A world leader in copper tube with a continued commitment to uncompromising quality and new service offerings to the markets we support.

WIN! Go to www.cerroflow.com/precision to learn more about Cerro and register to win a \$50 gift certificate of your choice.
